With buttons

Pros

- easy and intuitive to use
- cheap
- easy to code

Cons

- germ spread likely due to contact.
- looks outdated
- is identical to every other vending machine
- can break
- can be unintuitive depending on how it was set up.

With gestures

Pros

- no/little contact with the machine leading to less germ spread.

Cons

- can fail in the dark
- may be slow or not register some quick actions
- can't differentiate between different peoples hands.
- maybe hard learning curve

With voice to text

Pros

- no/little contact with machine preventing germ spread

Cons

- Different accents may not work as expected.
- may run slow
- people who dont speak at all or don't speak english well may not be able to use the machine
